EDUCATION

Master of Computer Science, University of Southern California (GPA: 3.76) 2024 - 2026

Bachelor of Computer Science, BMS College of Engineering (GPA: 9.21) 2016 - 2020

SKILLS

Languages	TypeScript, Python, Go
Frameworks	React, Vue.js, NestJS
Databases	PostgreSQL, MongoDB
Cloud & Devops	Docker, Jenkins, AWS, Git, REST, GraphQL, Postman

EXPERIENCE

Software Engineer Intern Jun 2025 - Mar 2026
SnapRefund Inc. *Los Angeles, CA*

- Engineered a **Role-Based Access Control (RBAC)** system using **Vue.js** and **Nuxt**, streamlining access control and cutting user on-boarding time by **80%** via dynamic role assignment and permissions gating
- Spearheaded automated unit, integration, and end-to-end testing using **Vitest** and **Playwright**, scaling coverage to **50%** in 4 weeks and reducing weekly production errors by **75%**

Senior Software Engineer Jun 2021 - Jul 2024
Accolite Digital (Client: Morgan Stanley) *Bangalore, KA, India*

- Developed a real-time investment analytics dashboard using **React** and **Highcharts**, enabling advisors to monitor portfolio performance, contributing to a **\$5M** increase in revenue across managed portfolios
- Architected "Blesk", a modular communication layer leveraging window.postMessage to enable secure container-widget interactions, slashing setup time by **30%** and easing cross-team integration
- Pioneered adoption of **React Tour**, **Theme Switch**, and **User Preferences**, enriching on-boarding experience and resulting in a **80%** increase in user satisfaction scores
- Achieved **80%+ JUnit** test coverage and enforced **Jenkins** pipeline checks to execute unit tests during deployment, lowering production defects by **half** and driving code quality gains
- Led a cross-functional team of **10+** developers, collaborating with stakeholders to define UI features while mentoring new engineers and interns, owning end-to-end UI delivery

Software Engineer Jul 2020 - Jun 2021
Accolite Digital (Client: Morgan Stanley) *Bangalore, KA, India*

- Drove micro-frontend architecture adoption using **Webpack Module Federation** with shared dependencies across **PWM Connect**, eliminating single points of failure and improving system resilience
- Accelerated CSS development by **50%** with **Tailwind CSS**, triggering faster feature roll-outs, while utilizing **Shadow DOM** for refined modularity and maintainability
- Replaced legacy cookie-based **Siteminder** authentication with **OpenID Connect (OIDC)**, reducing authentication latency by **30%** and improving session management efficiency by **40%**

PROJECTS

Personal Portfolio : Built and deployed an interactive portfolio website using **React** and **TypeScript** on **GitHub Pages**, featuring a modern **LLM**-inspired chat interface ([Try it here](#))
